BioDiversity is a multilayered program for primary and middle school students. Our mission is to engage, excite and educate students about the many facets of Biotechnology.

The BioDiversity Winter Institute is a 12-week virtual program for scholars in grades 3-8, designed to nurture next-gen scientists from the earliest age by providing advanced life sciences and biotechnology instruction. The focus is on enhancing minority interest in career paths in the life sciences.

The BioDiversity Writing Intensive is a 36-week hybrid program designed to develop scientific writing and research skills in the top performing middle school Winter Institute students. Student research papers will be published in a peer reviewed journal at the end of 36 weeks. Students will participate in monthly field trips to various science and math museums around across the U.S. Students that complete this program will advance to our Junior BioGENEius program, to be launched in the summer of 2022.

The BioDiversity Summer Intensive is a 4-week hybrid science and math program for continuing Writing Intensive participants. Students will attend virtual and live sessions and take science and math field trips. The purpose is to ensure that students are prepared for the rigors of AP high school science and math courses.

Admissions are rolling, but spaces are limited.
Application deadline: December 17th
